Diversity 360 Series: Stepping Out of Cultural Comfort Zones

Inclusive Excellence, Office of : Monday October 3, 2022

The Office of Inclusive Excellence, in collaboration with the Department of Government & Sociology, will present Stepping Out of Our Cultural Comfort Zones. The program will be held Monday, October 17 at 12 p.m. It is part of OIE's Diversity 360 Series.

The comfort zone is the place we find people we perceive to be most like us in terms of values, beliefs, customs, and worldview. While the comfort zone is a nice place to be, it does not boost cultural competence. That's because the comfort zone doesn't offer differing viewpoints and perspectives. It doesn't offer different ideas or solutions to problems. It doesn't make us think outside the box. It doesn't challenge us to consider the impact of our values, perspectives, and behaviors or the notion that different people may see the world in diverse ways.

If you want to increase your cultural competence and improve your ability to communicate across cultural differences, you need to step outside of your comfort zone. Dr. Sandra Godwin, Associate Professor in the Department of Government & Sociology, will discuss ways to empower our GC community with the tools needed to step out of our cultural comfort zones; thereby, improving not only our cultural competence but our campus climate.

[Please follow this link to register to attend and receive the Zoom link to join the event on October 17.](#)

Soul of Georgia exhibit opening with lecture by Dr. Maisha Akbar

Ina Dillard Russell Library : Monday October 10, 2022

The Ina Dillard Russell Library will celebrate the opening of “The Soul of Georgia” exhibit with an opening reception and lecture at 5:30 p.m., Wednesday, October 12 in the Ina Dillard Russell Library Special Collections Galleries in Heritage Hall, located at the corner of Montgomery and Clarke streets.

The opening reception will feature a lecture by Dr. Maisha Akbar, chair of the departments of Languages and Liberal Studies; and Visual and Performing Arts and Media Studies; and director of the Center for Social Justice at Fort Valley State University.

Akbar is author of “Preaching the Blues: Black Feminist Performance in Lynching Plays.” Her lecture will examine parallels between Black women depicted in anti-lynching plays to the treatment of Black female professionals during the COVID-19 pandemic. She will deliver “A Blueswoman Matters: Re-Visioning Blueswoman Performance in a (post?) COVID era” during “The Soul of Georgia” opening reception.

“The Soul of Georgia” exhibit tells the story of how Black artists shaped the sound of America—beginning in the churches, juke joints and summer picnics of the South, exploding over regional radio and finding a home on record players throughout the United State and across the world.

“The Soul of Georgia” chronicles that history through the careers of Georgia-grown superstars like James Brown, Otis Redding and Ray Charles, but pays special reverence to the experiences of Milledgeville standouts Gloria Walker and the Chevelles, whose record “Talking About My Baby” climbed the popular music charts during the summer of 1968.

Visitors are invited to take in the sound, imagery and information in-person at Georgia College’s Ina Dillard Russell Library Special Collections Galleries or have a distinct online experience through “The Soul of Georgia” digital companion exhibit at <https://bit.ly/soulofgeorgia>.

In this workshop, participants will identify the critical elements of quality assurance of online courses, including the materials and process; apply the concept of alignment, ensuring course components work together to help learners achieve desired learning goals; learn about the factors that impact course quality, and explore the structural elements of online courses to include: the overview and introduction, learning objectives, course technology, learner support, and accessibility. Participants exit the workshop with a basic understanding of QM, the QM Rubric, and the QM course review process. This workshop is a prerequisite for QM certification courses that lead to other QM roles. Also, upon completing the QM training, you will receive a certificate from Quality Matters, verifying your readiness to develop a quality online course.

Diversity 360 Series: Stepping Out of Cultural Comfort Zones

Inclusive Excellence, Office of : Tuesday October 11, 2022

The Office of Inclusive Excellence, in collaboration with the Department of Government & Sociology, will present Stepping Out of Our Cultural Comfort Zones. The program will be held Monday, October 17 at 12 p.m. It is part of OIE's Diversity 360 Series.

The comfort zone is the place we find people we perceive to be most like us in terms of values, beliefs, customs, and worldview. While the comfort zone is a nice place to be, it does not boost cultural competence. That's because the comfort zone doesn't offer differing viewpoints and perspectives. It doesn't offer different ideas or solutions to problems. It doesn't make us think outside the box. It doesn't challenge us to consider the impact of our values, perspectives, and behaviors or the notion that different people may see the world in diverse ways.

If you want to increase your cultural competence and improve your ability to communicate across cultural differences, you need to step outside of your comfort zone. Dr. Sandra Godwin, Associate Professor in the Department of Government & Sociology, will discuss ways to empower our GC community with the tools needed to step out of our cultural comfort zones; thereby, improving not only our cultural competence but our campus climate.

These thoughts are part of the survival mechanism in the mind which focuses on more negative details as a form of self protection. However, it is not the negative thoughts themselves that are the issue, but rather the importance that we give these thoughts that cause the problem. This session allows participants to learn how to gain control over negative thoughts and turn them into neutral or positive ones, helping to conquer unhealthy and unhelpful habits.

How participants will benefit

At the end of this session participants will be able to:

- Identify the symptoms and causes of negative thoughts.
- Apply strategies to disrupt negative thoughts.

Course Quality: Developing Quality Online Courses Certification - November 18, 9 a.m. to 4:30 p.m.

Center for Teaching & Learning : Tuesday October 11, 2022

Wouldn't you like to improve your online courses' quality and receive certification that you have completed a workshop for developing quality online courses? If so, the Center for Teaching and Learning offers you the opportunity to register for Quality Matters (QM) training. In this workshop, participants will identify the critical elements of quality assurance of online courses, including the materials and process; apply the concept of alignment, ensuring course components work together to help learners achieve desired learning goals; learn about the factors that impact course quality, and explore the structural elements of online courses to include: the overview and introduction, learning objectives, course technology, learner support, and accessibility. Participants exit the workshop with a basic understanding of QM, the QM Rubric, and the QM course review process. This workshop is a prerequisite for QM certification courses that lead to other QM roles. Also, upon completing the QM training, you will receive a certificate from Quality Matters, verifying your readiness to develop a quality online course.

Quality Matters Key Differences Between DYOC, FYOC, and APPQMR

Workshop	Specific Review Standards and Focus	Outcomes	Prerequisite
Designing Your Online Course (DYOC)	Participants use the Essential Specific Review Standards to the QM Rubric as a guide to design their own online course.	Participants exit the workshop with a course development plan they can use to develop their own online course.	The workshop is not a prerequisite for QM certification courses that lead to QM roles.
Preparing Your Online Course (FYOC)	Participants use the Essential Specific Review Standards to the QM Rubric as a guide to improve their own online course.	Participants exit the workshop with a course improvement plan they can use to improve their own online course.	The workshop is not a prerequisite for QM certification courses that lead to QM roles.
Applying the QM Rubric (APPQMR)	Participants use select Specific Review Standards to the QM Rubric to review sample course materials on a workshop.	Participants exit the workshop with a basic understanding of QM, the QM Rubric, and the QM course review process.	The workshop is a prerequisite for QM certification courses that lead to QM roles.

Once you have created an account, you can find and register for this offering in your QM portal by doing the following:

1. Login to your MyQM portal at <https://www.qmprogram.org/myqm>
2. Navigate to select the "Workshop - Register" menu
3. Select the "Dedicated Training" link

5. Select the "Register" link and follow the steps to register for the session.

We hope you will take advantage of this certification opportunity and join us on November 18. This workshop is open to the entire USG system statewide, and the seats are capped at

Latin America and Columbus Day

World Languages & Cultures, Department of : Wednesday October 12, 2022

INDIGENOUS PEOPLE DAY

Several of the Department of World Languages and Cultures Spanish 1001 level classes were assigned to research then create a poster that interprets the meaning of the international holiday, October 12.

To give you a brief explanation of why October 12 is an international holiday, we will start at a 1977 United Nations conference in Geneva. Indigenous delegates from around the world drafted a U.N. resolution declaring “to observe October 12, the day of so-called ‘discovery’ of America, as an International Day of Solidarity with the Indigenous Peoples of the Americas.”

How Latin America and its affected communities see the transition from pre-Hispanic times to the modern era is different from how European countries do.

As a way to rescue its indigenous roots and revisit this historical period, many Latin American countries have their own alternatives to what we know as Columbus Day, such as the Day of Respect for Cultural Diversity in Argentina, the Day of Cultures in Costa Rica, the Day of the Multicultural Nation in Mexico, and the Indigenous Resistance Day in Venezuela, among many others. Although the date was originally deemed Día de la Raza, or Day of the Race, all around, it has since been renamed. In 2002, the Venezuelan President officially first coined Indigenous Resistance Day, and the name has stayed ever since.

“Indigenous Peoples’ Day serves as a reminder of the diversity and depth of people. It is also a time to move forward and look to the future.

We invite you to visit Beeson Hall, third floor; A&S, second floor at rooms 273 and 271; and Russell Library to see the students’ posters reflecting the meaning of the international holiday that is observed on October 12 throughout many countries. The posters will be on display during the month of October.

Major Contemporary Artist Jeffrey Vallance Speaks at GC

Art, Department of : Wednesday October 12, 2022

Please join us on Monday, October 17, at 5:30 p.m. for a Zoom presentation with Jeffrey Vallance, followed by an audience Q&A with this important voice from the world of contemporary America art. This free event is sponsored by the GC Department of Art Visiting Artists and Scholars Program. Zoom link: <https://gcsu.zoom.us/j/91712850707> or use the QR code on the attached announcement.

"For over 30 years, Jeffrey Vallance has turned a critical and humorous eye toward his own wide-ranging experiences. Based on the artist's memories and adventures, Vallance's drawings, sculptures, installations and performance-based works make reference to his childhood in California, voyages to the Polynesian Islands and Iceland, residences in Las Vegas and the Arctic, sojourns to the Vatican, and to his celebrated Blinky the Friendly Hen project in 1978, when he held a funeral service for a frozen supermarket hen at Los Angeles Pet Memorial Park. The artist's examination of these experiences combines a pseudo-anthropological approach with an art historically informed practice, and addresses themes of faith, myth, ritual and popular culture, along with the geopolitical landscapes of the past and present."

13WMAZ will be on campus—to get your thoughts on upcoming midterm elections

University Communications : Thursday October 13, 2022

A news team from 13WMAZ will be on Front Campus all day Wednesday, Oct. 19, conducting a “listening lab” designed to get opinions from students, faculty, staff and residents about the midterm elections.

The election is Tuesday, Nov. 8. Other listening labs around Central Georgia this month will be in Perry and Dublin. Those will focus on the general population.

At Georgia College & State University, news reporters especially want to hear from young voters and get their perspective on the political scene. They want to know who will vote or not vote and why. They'll ask which issues are important to you this election year like abortion, inflation, taxes and gun control.

13WMAZ is interested in all viewpoints—but remember, personal views do not reflect the position of the university which remains neutral on topics with a political or controversial nature.

The news team will set up around 6 a.m. on Front Campus and stay until about 6:30 p.m. Willing participants will be interviewed on camera and be part of TV news throughout the day—on 13's morning and noon shows and 5 and 6 p.m. newscasts.

13WMAZ staff will also conduct surveys and hand out informational sheets about voting—where precincts are located, important websites, dates, etc.

For more information, please contact Erica Carr, special projects coordinator at 13WMAZ, at 478-752-1309.

CTL Workshops - Creating Community in the Classroom

Center for Teaching & Learning : Thursday October 20, 2022

Community in the classroom is more than just knowing everyone's name (though that's a great start!). It is also more than building relationships between the teacher and students; it's about connecting the students in the classroom as well. Community is a space where students share and challenge ideas, feel a sense of belonging, and are comfortable making mistakes. Building community involves intentional planning and actions. Sounds like a lot of extra work? Actually there are lots of simple strategies that we can utilize in our classes to both build and maintain community with and amongst our students. Join the students in the Experiential Education class to learn more about small but intentional strategies that you can use to build community in your classroom!

Please consider [registering to join us](#) on either Tuesday, November 8 at 2pm or Monday, November 14 at 12:30 pm for information on how to encourage community building among your students. We hope you will take advantage of this exciting opportunity!

GCSU holds its 20th chemistry Family Fun Night

Chemistry, Physics, & Astronomy, Department of : Monday October 24, 2022

On Thursday, Oct. 27, Georgia College & State University will hold its 20th "Family Fun Night" for the community. A lineup of interactive activities includes hands-on chemistry experiments, an outdoor pyrochemistry show, a haunted black-light maze and a planetarium show.

About 50 undergraduate students will assist community members at 10 hands-on activity stations at Herty Hall on Wilkinson Street in Milledgeville. The event is from 5 to 8:30 p.m. The chemistry magic show begins at 6:30 p.m.

Family Fun Night is part of National Chemistry Week, sponsored by the American Chemical Society. This year's theme is "Fabulous Fibers: The Chemistry of Fabrics!" and will include a fiber-and-fabrics room supplied by GCSU alumna Alexia Crawford, '19, who works for FiberVisions, an Indorma Ventures Company.

"The goal of our theme room is to expose the community to chemistry in their everyday lives and I couldn't be prouder that one of our graduates will be presenting the information," said Dr. Catrena Lisse, director of GCSU's Science Education Center. "As an educator, I sincerely enjoy these types of events and seeing the excitement from participants."

This event draws more than 200 Central Georgia children and their families, who enjoy the pre-Halloween fun and exciting games. Come see gigantic eruptions of "elephant toothpaste," dancing Gummy Bears and pumpkins carved the chemistry way.

Family Fun Night is hosted by the GCSU Chemistry Club, Science Education Center and Department of Chemistry, Physics and Astronomy.
