

STIMULUS THRESHOLD AND TOLERANCE STUDY IN ATHLETES

Georgia College Human Performance Lab

Fall 2021 / Spring 2022

****Must be COVID-19 negative and have
no recent exposure to participate****

****Study Participants needed:**

To examine the levels of stimulus threshold and tolerance within a group of female exercisers, competition, and performance athletes to determine if a difference exists.

Healthy Female participants

- * 18 - 35 years old
- * CURRENTLY EXERCISING
- * PERFORMANCE or COMPETITIVE athlete

Determine your:

Body Composition (% Body Fat / % Lean Body mass)
Pain threshold and tolerance levels
