## VIRTUAL LEARNING SERIES

Preparing Children for Language, Literacy, and Life

### Part Three

#### Social-Emotional Development and Understanding Behavior

Examine how social-emotional development unfolds in the first 5 years, the role relationships and attachment play in this development, the specifics of empathy development, key factors that influence behavior, and root causes and effective strategies to address behaviors that challenge.

- Summarize how social-emotional development unfolds in the first 5 years.
- Describe the role of relationships and attachment in social-emotional development.
- Outline the development of empathy.
- Identify the key factors that influence behavior.
- Explain the root causes of behaviors that are challenging and articulate effective strategies to address them.

Free professional learning with CEU's or GaPDS/DECAL credit hours available after completion of session and survey.

### The Growing Brain Basics: A Four-Part Series

The question of how babies' brains grow in the context of relationships is one of the most important topics in early childhood development. Research on this topic is exploding, underscoring the need for early childhood professionals to learn about foundations of brain development and strategies to best support the growing brains of infants and young children. This series supports participants' exploration of key concepts, research, and concrete strategies from ZERO TO THREE's- The Growing Brain: From Birth to 5 Years Old curriculum.
